# IT ALL STARTS WITH LIGHT

Three different quotations were received for a stunning fashion shop. An interior designer stuck to a drawing table, finally realized the perfect colour to put on the walls. Endless discussions were held about the right counter. The interior of a shop has to be on point. The design of the establishment determines the atmosphere and appearance, it's part of your brand.

But what to do with the lighting? How do you incorporate this into your design, to contribute to presentation and atmosphere? Have you ever really thought about this? At Internova we have! Our lighting professionals are always available to support and advise you.

# NO LIGHT WITHOUT A PLAN

Light creates atmosphere, branding, conversion and routing. Good lighting does not consist of a simple combination of spots and tracks. For the right lighting, a well-thought-out lighting plan is essential. Internova designs and realizes customized lighting plans. Lighting is a speciality. And therefore; Internova Professional Lighting.

## DOBLAR

Recessed directable LED luminaire. Can be perfectly used for the lighting of wall presentations and product shelves, ideal for retail shops. Suitable for Premium White modules.

## FLEXIBLE SETUP

As an expert in lighting for shops, INTERNOVA has realized the lighting for a large number of projects and retail chains. An important point of attention is always the flexibility of the lighting. When the layout of the shop changes, the lighting must always be easy to adjust and change. That's why the tracklights made by Internova in combination with our flexible Powergear® tracksystem are perfect to be used in any shop.

Our versatile tracksystem can be used both for general lighting as for spot lighting.

## LINEA

Linear LED fixture with a 3-phase track connection. Ideally suited for general lighting. Available in 60cm and 100cm length.
